SELLER REMARKS:

This bull is bred from the Sigwart, Jaap Prinsloo and Wagner bloodlines. A larger framed bull with lots of meat, capacity, length and breadth. Low on birth but should be used on cows. Would breed excellent replacement heifers and can be used both in the weaner and ox production systems. Checks all the boxes on traits for production under extensive conditions. He has good conformation, capacity and is a robust bull that will keep his condition anywhere in the country. A superb bull that can add a lot of value in a crossbreeding production system.

SELLER REMARKS:

This is a robust bull with lots of capacity and excellent confirmation. He is medium framed and should produce calves that are light at birth with sufficient post wean growth under extensive conditions. His production values indicate good growth at wean and post wean. The breeding values for ADG and Feed Conversion Rate indicates that his progeny will be perfectly suited for rounding off from the veld in both production systems. His maintenance under extensive conditions is excellent and indicates low input cost genetics at work. Has confirmed polled genes from the sire side. Stud farmers should look closely at this one.

VERKOPER OPMERKINGS:

This is an exceptional specialist bull for wean and post wean growth from the veld. Top of the class with growth values at 15% higher than the rest of his group. Depth, width, conformation, capacity, length and lots of meat. A robust bull that will keep his condition anywhere in the country. A superb bull that can add a lot of value in a crossbreeding production system. His maintenance under extensive conditions is excellent and indicates low input cost genetics at work. A bull that can add a lot of value in a crossbreeding production system.

THE SIMBRA AUCTION RULES

1. Introduction

The purpose of the auction rules is to ensure as far as possible that all Simbras that are offered at auctions meet (even if they were previously inspected) the breed standards and an acceptable criterion in terms of fertility and/or reproduction as well as certain health requirements and applies to all public/online/catalog auctions. All Simbras so sold therefore take place subject to the rules of the Society. Registered Simbras that do not comply with the rules may not be offered for sale on auction.

There are three sections in an official Simbra auction catalog:

Section A – Registered: Registered bulls (with S brand on left shoulder), and registered females and calf book animals under 9 months or suckling calves.

Section B – CUM F1 heifers: Heifers that have already been recorded as CUM F1 animals in the Simbra herd book system.

Section C- Commercial animals: Simbra type female animals that are phenotypically of such quality that they can be considered as CUM animals.

2. General

2.1. All animals must be screened a maximum of 90 days before an auction by an accredited inspector/selector who will act as patron of that specific Sale.

2.1.1. Bulls must be scored according to the Simbra linear classification system, and females must receive an overall appearance score.

2.1.2. Animals that do not meet minimum standards may not be offered for sale.

2.2. All bulls that will sire and have sired calves (eligible for registration) born from 1 September 2022 must be genotyped and have a SNP genotype on record before a pregnant animal or cow with young calf referred to herein is offered at auction.

2.3. All Simbras offered by public auction are sold subject to the Auction Rules of the Society.

3. Auction Rules

3.1. Animals older than 9 months (on auction day) will be offered as registered animals in the catalog and ownership will be transferred to the buyer at the seller's expense.

3.2. Animals under 9 months on date of auction are recorded as calf book and will be transferred to the buyer at the seller's expense. Members of the Society can offer these animals between 1 and 3 years of age for full registration in the Herd Book.

3.3. The seller has signed and submitted the "Sellers Declaration":

3.4. Animals on offer are tattooed and checked, and that they correspond to the records of the society. If the buyer can provide proof within 30 days of the auction that the animal is not tattooed or has been wrongly tattooed, **guarantee 6** will apply.

- 3.5. All bulls must, no longer than 45 days before the auction have been certified as fertile by a veterinarian in the prescribed format with specific reference to, motility, morphology, and scrotal circumference.

Semen must be evaluated, and results must be specified on the fertility report. A certificate must be issued.

Fertility is guaranteed by the seller until 7 calendar days after the auction date or in certain special cases, 7 days after the buyer has taken delivery of the bull. The original Fertility Certificate must be handed to the new owner with the purchase of the Bull.

If the buyer presents a veterinary certificate proving the contrary within 7 days of the auction (or in special cases as previously arranged with the seller from the receipt of the bull), **guarantee 6** will apply.

- 3.6. Any guarantees regarding the freezing of semen will be made by a separate agreement between the buyer and seller.
- 3.7. All bulls must be tested clean for Trichomoniasis and Vibriosis. This must be indicated on the Fertility Certificate.
- 3.8. All sires of calves that are eligible for calf book registration and that are not yet on record with the Society, and bulls from which cows are in calf, as well as semen, must have a SNP genotyping profile and a Sire verification on record. Bulls must be registered.
- 3.9. Any female offered in calf must be certified "in calf" by a veterinarian. This certification may not be older than 30 days. Such certification will be handed to the Purchaser on the day of Sale.

4. **Animals appearing in one of these 3 parts of the catalog must comply with the following rules:**

- 4.1.1. All Simbra Cattle must be registered with the Simbra Breeders Society of Southern Africa and animal must be owned by the Seller.

RAAD- en TELERSVERGADERING SEPT 2019

HAAL DIE RAAIWERK UIT BULKOOP

Genetiese teeltwaardes (die syfers in die tabel by elke lot nr en hieronder) is die beste aanduiding van hoe 'n bul gaan teel en is 'n goeie seleksie-hulpmiddel.

Meer hieroor onder aan die bladsy.

Die **SIMMENTALER RAS** se BREEDPLAN teeltwaardes word hier in die boonste derde, middelste en laagste derdes verdeel. Plaas die teeltwaardes van 'n dier in een van dié drie groepe en moenie dat klein verskille in teeltwaardes u pla nie. Telers moet hul individuele teeltbeleid ingedagte hou tydens bulseleksie.

- Is NIE oor rasse heen vergelykbaar nie.
- Stel jou in staat om diere binne die Simmentaler ras, tussen kuddes en oor jare met mekaar te vergelyk. (Jy kan bv 'n drie jaar oud bul in Windhoek vergelyk met 'n jaaroud bul in Pretoria).
- Die hoogste TW is nie noodwendig die beste nie. Die ideaal vir Simmentaler is in die onderste kolom van die tabel hierbo.
- Die betroubaarheid van TWs word in 'n % syfer uitgedruk wat onder die TW staan – hoe hoër die % hoe kleiner die waarskynlikheid dat die teeltwaarde kan verander.
- Verander jaarliks soos wat meer inligting bykom. ('n TW het 'n gelyke kans om op- of afwaarts te verander).
- Hoe vergelyk vandag se TWs van my "ou bul" met die jong bul wat ek nou in die oog het? (Om my kudde te verbeter moet die jong bul mos beter wees as die oue). Besoek www.simmentaler.org, kies "Dier Navraag / Animal Enquiry" en tik die bul se identifikasie (in die oor) in die veld "Animal Identifier" vir die jongste TWs – die diens is gratis beskikbaar aan alle belangstellendes.

Dankie vir u belangstelling
